

BELVIR Workshop

**The Path Towards Novel Antiviral Therapies:
Discovery and Development**

May 31, 2017 - University of Leuven

BELVIR Workshop on The Path Towards Novel Antiviral Therapies

May 31, 2017 - University of Leuven

May 31, 2017 - General information

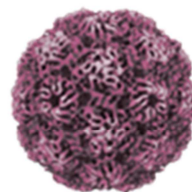

All welcome

This workshop will be co-organized by AIROPICO, a European consortium studying picornavirus biology, diagnostics and therapy development (www.airopico.eu).

Rega Institute
Herestraat 49, Leuven

Details on the program will be communicated later but we aim at covering the following topics:

- Identifying antiviral hits in phenotypic screens (including compound and database management)
- High content imaging in antiviral screening. High throughput automatization & lab-in-a-box CapsIt
- Target based screening & structure based/fragment based drug discovery
- The importance of medicinal chemistry in drug development
- Preclinical animal testing (efficacy and safety)
- Intellectual property
- Clinical development for human medicines
- Clinical development for veterinary medicines
